Social media and social networks are digital platforms that enable users to create, share, and interact with content and communities online. In education, these tools are increasingly used to enhance communication, collaboration, and engagement among students and educators. Platforms like Facebook, Instagram, and LinkedIn support academic networking, while tools such as Moodle and Blackboard integrate social features into learning management systems. While social media can foster creativity and peer support, it also raises concerns about distraction and mental health. Educators are exploring balanced approaches to harness its benefits while mitigating potential drawbacks.

摘要/詳細資料

摘要

A bumper northern hemisphere harvest commenced in September 2024, which will keep downward pressure on prices. A weak La Niña weather pattern is expected to persist over February-April 2025, according to the US National Oceanic and Atmospheric Administration. Average cocoa prices increased by 37.5% in 2023 and by an unprecedented 127% in 2024. EU deforestation regulation may disrupt supply chains and raise prices The EU Deforestation-free Supply Chain Regulation (EUDR), which has been delayed and is now set to take effect from December 30th 2025, is expected to have a significant impact on the prices of various food commodities.

探討棲地復育案例深入研究

「**棲地復育**」是一個過程，指人類為了特定之目的，以**人為**的方式將環境「回復」到各種形式的破壞或退化之前的狀態。

台灣都市棲地復育的代表案例之一是**台北市關渡自然公園**，曾因濕地陸域化影響候鳥棲息，市府與學者合作進行水域復育，改善棲地環境。復育後候鳥數量明顯回升，不僅提升生物多樣性，也強化了生態教育與休憩功能。

It also lists 'Additional topics discussed include: Public participation in wildlife conservation' and offers a '顯示更多' option. The main article text begins with '棲息地恢復是一種有效的策略, 可以減輕瀕危物種棲息地的衰退和碎片。自 2018 年起, 大熊貓國家公園 (GNPN) 與私營機構合作推出了一項試驗計劃, 以恢復大象嶺山的大熊貓棲息地。本研究專注於與 GNPN 司法管轄區相交的英井縣五個鎮居民, 旨在探討他們對正在進行的棲息地恢復項目的反應。數據是使用基於大熊貓棲息地恢復項目的「感知-態度-參與」框架的問卷收集的數據。在一對一面試中分發的 151 個問卷調查中, 收集了 146 個有效回覆。研究結果顯示, 受訪者一般對棲息地恢復保持積極的態度。然而, 他們對棲息地恢復的整體感覺仍然相對較低, 而且廣泛的參與尚未實現。很重要的是, 我們的分析表明受訪者的參與分數與他們的感知分數和態度分數之間存在正面的關聯性。這項結果顯示了公眾參與野生動物保護工作的重要性, 從而提高他們對生態保護的意識和良善。我們建議 GNPN 員工加強努力推動棲息地恢復項目, 尤其是針對存取信息和知識有限的人士。通過這樣做, 我們旨在擴大參與範圍, 並激發居民對生態保護的熱情。'

摘要

Habitat restoration is an effective strategy to mitigate the degradation and fragmentation of habitats for endangered species. Since 2018, the Giant Panda National Park (GPNP), in collaboration with private institutions, launched a pilot initiative to restore giant panda habitats in the Daxiangling Mountains. This study focuses on the residents from five townships in Yingjing County that intersect with GPNP's jurisdiction, aiming to explore their responses to the ongoing habitat restoration projects. Data were collected using a questionnaire based on the "Perception—Attitude—Participation" framework concerning the giant panda habitat restoration project. Out of 151 questionnaires were distributed during one-on-one interviews, 146 valid responses were collected. The findings reveal that respondents generally maintain a positive attitude towards habitat restoration. However, their overall perception of habitat restoration remains relatively low, and widespread participation has yet to materialize. Significantly, our analysis demonstrates a positive correlation between respondents' participation scores and both their perception scores and attitude scores. This result highlights the importance of public participation in wildlife conservation work, thereby promoting their awareness and goodwill towards ecological protection. We recommend that the GPNP workforce intensify efforts to promote habitat restoration projects, particularly targeting individuals with limited access to information and knowledge. By doing so, we aim to broaden the scope of participation and ignite residents' enthusiasm for ecological conservation.

To implement and evaluate a curriculum development seminar in which graduate students experienced circumstances that occur when faculty members develop and attempt to secure colleague approval for a curriculum. Design. Learning activities for the graduate seminar included classroom lectures, active learning, and a group project in which simulated faculty committees created new curriculums for the pharmacy practice department's 3 research areas. Assessment. Responses on pre- and post-seminar focus groups indicated that graduate students valued participating in the faculty simulation, learning about curriculum development, and collaborating with their peers. In a post-seminar focus group, graduate students stated that they valued participating in the faculty simulation, learning about curriculum development, and collaborating with their peers. A curriculum development faculty simulation was an effective tool for preparing graduate students for curriculum development responsibilities and generated valuable documents that the department could use in the revision of the 3 pharmacy practice graduate school curricula. What are the findings or conclusions?

Here are the findings or conclusions.

The document aims to analyze the representation of four Sustainable Development Goals (SDGs) within international elementary science curricula and textbooks, focusing on how these goals are integrated into educational frameworks. It emphasizes the importance of Education for Sustainable Development (ESD) in equipping students with the necessary knowledge, skills, and ethical perspectives to engage with sustainability issues.

The main findings of the analysis reveal several key trends regarding the representation of SDGs across different grade levels:

- SDG 4 (Quality Education):** In early grades, particularly grade 1, there is a strong emphasis on skills and applications, which constitutes 48% of the learning outcomes. However, this focus on practical skills raises concerns about the lack of foundational knowledge and ethical perspectives, which are crucial for a holistic understanding of quality education. ①
- SDG 8 (Decent Work and Economic Growth):** The curriculum shows a fluctuating representation of skills and applications from grades 1 to 4, with a notable absence of skill-based learning in grade 2. This shift towards theoretical knowledge and values in grade 2 suggests a gap in practical skill development, which is essential for understanding economic principles. ② ③
- SDG 15 (Life on Land):** The analysis indicates that grade 1 textbooks provide significant coverage of knowledge and understanding related to ecosystems, but the representation of skills and values is less pronounced. This suggests a need for a more balanced approach that includes practical applications alongside theoretical knowledge. ③ ④

The document concludes by highlighting the necessity for further research into the integration of SDGs across various educational levels, including higher education. It suggests that expanding the focus beyond the four SDGs analyzed could

What are the essential details?

Here are the essential details.

Main Point
The study evaluates the representation of Sustainable Development Goals (SDGs) in international elementary science curricula and textbooks. ①

Purpose/Hypothesis
The research aims to identify shortcomings in the curriculum regarding the coverage of various SDGs, particularly focusing on the ethical and moral dimensions of education. ② ①

Study Design/Methods
The study analyzes textbooks from grades 1 to 4, assessing the coverage of SDGs 4 (Quality Education), 6 (Clean Water and Sanitation), 8 (Decent Work and Economic Growth), and 15 (Life on Land). ①

Results/Outcomes
The findings indicate that SDG 4 and SDG 15 received moderate to high coverage, while SDG 6 and SDG 8 were minimally covered or nearly omitted. ①

Implications
The study suggests the need to prioritize Education for Sustainable Development (ESD) and incorporate overlooked SDGs into the educational framework to better prepare students for future challenges. ①

Study Limitations
The research highlights a significant discrepancy in adequately encompassing all SDGs, particularly noting the lack of depth in content knowledge and value formation. ③

Describe the **important concepts**.

Here are the **important concepts**.

- SDG 4:** Sustainable Development Goal 4 focuses on ensuring inclusive and equitable quality education and promoting lifelong learning opportunities for all. Its significance in the document lies in its prominent representation in the UAE elementary science curriculum, highlighting the importance of quality education in achieving sustainable development.
- SDG 6:** Sustainable Development Goal 6 aims to ensure availability and sustainable management of water and sanitation for all. The document emphasizes its minimal representation in the UAE curriculum, indicating a critical gap in addressing water-related issues in education.
- SDG 8:** Sustainable Development Goal 8 promotes sustained, inclusive, and sustainable economic growth, full and productive employment, and decent work for all. Its limited coverage in the curriculum suggests a need for greater emphasis on economic growth and employment issues in educational content.
- SDG 15:** Sustainable Development Goal 15 focuses on protecting, restoring, and promoting sustainable use of terrestrial ecosystems, managing forests sustainably, and combating desertification. The document highlights its moderate representation in the curriculum, underscoring the importance of environmental education.
- Education for Sustainable Development (ESD):** Education for Sustainable Development is an educational process that aims to empower individuals to make informed decisions, promote economic viability, and a just society. Its significance lies in its close integration with the SDGs to foster sustainable practices.
- UAE Elementary School Science Curriculum:** The UAE Elementary School Science Curriculum provides the framework for teaching science to students in grades 1 to 4, integrating various educational goals including the SDGs. Its analysis in the document reveals strengths and weaknesses in addressing sustainability topics, particularly in relation to the SDGs.
